

INDEX TO VOLUME 57

<i>Allen, T.</i> —The evolution of free disturbances on an initially two-dimensional inflectional boundary-layer flow	115
<i>Amendola, G.</i> and <i>Carillo, S.</i> —Thermal work and minimum free energy in a heat conductor with memory	429
<i>Antipov, Y. A.</i> and <i>Silvestrov, V. V.</i> —Second-order functional-difference equations. I: Method of the Riemann–Hilbert problem on Riemann surfaces	245
<i>Antipov, Y. A.</i> and <i>Silvestrov, V. V.</i> —Second-order functional-difference equations. II: Scattering from a right-angled conductive wedge for <i>E</i> -polarization	267
<i>Badsar, S. A.</i> see <i>Hasheminejad, S. M.</i>	
<i>Berlyand, L.</i> , <i>Golovaty, D.</i> , <i>Movchan, A.</i> and <i>Phillips, J.</i> —Transport properties of densely packed composites. Effect of shapes and spacings of inclusions	495
<i>Bóna, A.</i> , <i>Bucataru, I.</i> and <i>Slawinski, M. A.</i> —Material symmetries of elasticity tensors	583
<i>Bonnet, M.</i> see <i>Guzina, B. B.</i>	
<i>Bradford, M. A.</i> see <i>Pi, Y.-L.</i>	
<i>Bucataru, I.</i> see <i>Bóna, A.</i>	
<i>Carillo, S.</i> see <i>Amendola, G.</i>	
<i>Chen, T.</i> see <i>Ting, T. C. T.</i>	
<i>Chiriță, S.</i> see <i>Fabrizio, M.</i>	
<i>Cooker, M. J.</i> —Free-surface motion of a thin sheet of inviscid fluid	393
<i>Daros, C. H.</i> —The elastic wave front shape generated by a circular source in a piezoelectric medium of crystal class 6mm	315
<i>Dassios, G.</i> , <i>Payatakes, A. C.</i> and <i>Vafeas, P.</i> —Interrelation between Papkovich–Neuber and Stokes general solutions of the Stokes equations in spheroidal geometry	181
<i>Dorfmann, A.</i> and <i>Ogden, R. W.</i> —Nonlinear magnetoelastic deformations	599

<i>Fabrizio, M.</i> and <i>Chirījă, S.</i> —Some qualitative results on the dynamic viscoelasticity of the Reissner–Mindlin plate model	59
<i>Golovaty, D.</i> see <i>Berlyand, L.</i>	
<i>Guenneau, S.</i> , <i>Movchan, A. B.</i> , <i>Poulton C. G.</i> and <i>Nicolet, A.</i> —Coupling between electromagnetic and mechanical vibrations of thin-walled structures	407
<i>Gutiérrez, S.</i> —Laminations in planar anisotropic linear elasticity	571
<i>Guzina, B. B.</i> and <i>Bonnet, M.</i> —Topological derivative for the inverse scattering of elastic waves	161
<i>Hasheminejad, S. M.</i> and <i>Badsar, S. A.</i> —Acoustic scattering by a pair of poroelastic spheres	95
<i>Hayes, M. A.</i> and <i>Saccomandi, G.</i> —Antiplane shear motions for viscoelastic Mooney–Rivlin materials	379
<i>Hild, P.</i> —Non-unique slipping in the Coulomb friction model in two-dimensional linear elasticity	225
<i>Hill, J. M.</i> see <i>Thamwattana, N.</i>	
<i>Kaiser, R.</i> and <i>Uecker, H.</i> —Relaxed plasma–vacuum states in cylinders	1
<i>King, J. R.</i> and <i>Meere, M. G.</i> —The dissociative diffusion mechanism with charge effects II: Two-dimensional in-diffusion	19
<i>Kiss, I.</i> , <i>Merkin, J. H.</i> , <i>Scott, S. K.</i> and <i>Simon, P. L.</i> —Electric field effects on travelling waves in the Oregonator model for the Belousov–Zhabotinsky reaction	467
<i>Klimenko, A. Y.</i> —On the inverse parabolicity of PDF equations in turbulent flows	79
<i>Li, K. S.</i> see <i>Ting, T. C. T.</i>	
<i>Meere, M. G.</i> see <i>King, J. R.</i>	
<i>Merkin, J. H.</i> see <i>Kiss, I.</i>	
<i>Movchan, A.</i> see <i>Berlyand, L.</i>	
<i>Movchan, A. B.</i> see <i>Guenneau, S.</i>	
<i>Nicolet, A.</i> see <i>Guenneau, S.</i>	
<i>Ogden, R. W.</i> see <i>Dorfmann, A.</i>	
<i>Payatakes, A. C.</i> see <i>Dassios, G.</i>	

<i>Phillips, J.</i> see <i>Berlyand, L.</i>	
<i>Pi, Y.-L.</i> and <i>Bradford, M. A.</i> —Elastic flexural-torsional buckling of fixed arches	551
<i>Poulton C. G.</i> see <i>Guenneau, S.</i>	
<i>Purvis, R.</i> and <i>Smith, F. T.</i> —Planar flow past two or more blades in ground effect	137
<i>Riley, N.</i> —On the control of laminar flow separation	237
<i>Roberts, A. J.</i> and <i>Strunin, D. V.</i> —Two-zone model of shear dispersion in a channel using centre manifolds	363
<i>Saccomandi, G.</i> see <i>Hayes, M. A.</i>	
<i>Scott, S. K.</i> see <i>Kiss, I.</i>	
<i>Silvestrov, V. V.</i> see <i>Antipov, Y. A.</i>	
<i>Simon, P. L.</i> see <i>Kiss, I.</i>	
<i>Slawinski, M. A.</i> see <i>Bóna, A.</i>	
<i>Smith, F. T.</i> see <i>Purvis, R.</i>	
<i>Strunin, D. V.</i> see <i>Roberts, A. J.</i>	
<i>Thamwattana, N.</i> and <i>Hill, J. M.</i> —Stress distributions within curved highly frictional granular stockpiles	447
<i>Ting, T. C. T.</i> , <i>Chen, T.</i> and <i>Li, K. S.</i> —Torsion of an isotropic shaft of arbitrary cross-section embedded with multicoated or graded circular cylinders of cylindrically orthotropic materials	347
<i>Uecker, H.</i> see <i>Kaiser, R.</i>	
<i>Ursell, F.</i> —The waves due to a submerged sphere moving in a canal	335
<i>Vafeas, P.</i> see <i>Dassios, G.</i>	
<i>Yang, F.</i> —General solutions of a penny-shaped crack in a piezoelectric material under opening mode loading	529
<i>Zenkour, A. M.</i> —Bending of a sector-shaped annular plate with continuous thickness variation along the radial direction	205
